PROJECTS

Application Form App
https://application-form-app-abdelrhman-abdelmoaty.vercel.app/

- Created a dynamic application form connected to an API for real-time data management. Overcame challenges:
  1. Efficient Data Management: Transitioned to Redux Toolkit for streamlined state updates.
  2. Strict API Handling: Managed a YAML API format.
  3. TypeScript: Ensured reliable code with interfaces and type-checking.
  4. DRY Approach: Improved performance with a reusable form component.

Prada Interior Design
https://abdelrhman-abdelmoaty.github.io/Prada-Interior-Design/public/index.html

- I harnessed the power of Tailwind framework to create a sleek and responsive design. Plus, I supercharged performance with JavaScript optimizations like throttle function, ensuring swift load times and smooth animations.

Quizy App

- Just like sharpening a knife, I've refined my javascript skills,

AUDI A8 2019 Website
https://abdelrhman-abdelmoaty.github.io/AUDI/
February 2023

- Utilized reusable components and JSX syntax for efficient, clean code. Leveraged React's component-based architecture for easy updates and maintenance. Implemented virtual DOM and React Hooks for enhanced performance, state management, and functional components.

ToDo APP
